

First of May

Outdoor Fucking Starts Today

Hooray Hooray! It's the First of May. Outdoor fucking starts today! And you are in the park to fuck everyone who needs fucking. The park is full of characters from JoCo songs. Whoever fucks the most characters wins.

First of May is based on the Jonathan Coulton song. <http://jonathancoulton.com>

Setup

I woke up this morning. I had a scone and a large house blend.

Before playing for the first time, you need to print out all the files.

- Print out the board, cut it out and assemble it into the park. I suggest taping it together so it won't separate, maybe even attaching it to cardboard.
- Print out the cards – they fit on standard business cards. Print the card backs on the back of the cards.
- Print out the character charts. Each player will need one character chart, and you'll need more for each game.
- You will also need a pencil for each player, three tokens for each player, and a pawn for each player.

Ooh ooh child, now's the time for all the people to get together.

Before each play of the game, you need to do the following:

- Place the board flat. Shuffle the deck and place five cards face down on each of the big yellow rectangles.
- Each player will need a character chart, a pencil, and their own pawn or playing piece.
- Choose a first player.
- Create your characters.

Creating Characters

I called up my old lady. She wasn't home so I called my girl

Starting with the first player and going clockwise, each player fills out their character charts.

First, write your porn name on the chart. Your porn name is the name of your first pet followed by the name of the street where you grew up. Mine is *Candy Kilburn* if you care.

Next, fill out your stats. You have three stats:

- **Speed** is the number of spaces you may move each turn. You may move fewer spaces if you wish, but you never move more than your Speed.
- **Endurance** is how frequently you can fuck without rest. You will start the game with Endurance tokens equal to your stat. Each time you fuck, you must spend a token. You may replenish by not fucking. More details to come.
- **Positions** are how flexible you are. You may only fuck people whose positions you know. There are four positions:

Missionary

Doggy Style,

T-Bone (also known as Woman on Top), and

Freaky (question marks).

You **must** set one stat to 1, one to 2, and one to 3. Choose your positions at this time too. You get as many positions as your stat. Check the boxes to the left of the positions you want.

Advanced Rule: Try this if everyone is familiar with the game. After everyone has chosen their stats, one player may choose to make their stats 1, 1, 3 or 1, 2, 2 instead. If so, that player gets all of the face up *special* cards before the game starts (see below about special cards).

So we went to the park together. We were walking in the midday sun.

After everyone has made their stats, turn the top card of each pile face up. Starting with the first player and going clockwise, each player places their pawn on one of the park gates. The game begins once everyone has placed.

Gameplay

We met all kinds of people and we fucked everyone.

Starting with the first player and moving clockwise, each player takes their turn in sequence moving their pawn around the board and fucking characters.

On your turn, you may move as many spaces as your speed. You may always choose to move fewer. You must move along the brown paths of the park. A space is either one of the big rectangles (with or without cards) or a yellow square. You may move to a space occupied by another pawn.

If there is a pile of cards with no pawn on it and whose top card is face down and you *could* move to it without using a special card (see below), you *may* turn its top card face up. You may do this as many times during your turn as you wish, as long as you could legitimately move to the pile.

If you are on a character card who has *any* positions matching *any* of your positions, you may fuck that character. You must spend an endurance token each time you fuck. You may not fuck if you have no tokens. If you have enough tokens and speed, you may fuck multiple times during your turn.

After fucking the character, remove the card from the pile and keep it near your character chart as a reminder. Whoever has the most characters at the end of the game, wins. **Do not turn the next card face up.**

If you are on a special, green card, you may simply take it and place it *face up* near your chart. You may not have more than **one** of any one particular green card at a time. There are four different kinds.

- **Scones:** Eating one allows you to gain counters up to your Endurance.
- **Large House Blend:** You may immediately move to any space in the park that does not already have a pawn on it.
- **Squirrel & Chipmunk Friends:** You may fuck a character with any Position until the end of the turn.
- **Watch an Episode of the People's Court:** Reset all your stats to 2, changing your positions as desired, and losing any Endurance Counters above your new Endurance. These new stats remain for the rest of the game.

You may play any green cards you have at any time during your turn. They are quite powerful. After playing a green card, gain its effects and place the green card to the side, removed from the game.

Resting. If you do not fuck anyone on your turn, gain one Endurance token, but not so that you have more than your Endurance stat. You can do this even if you move during your turn.

Endgame

Everyone who needed fucking well they got fucked today.

The game immediately ends as soon as there are as many depleted piles of cards as there are players. That is, if there are four players, the game ends immediately as soon as four piles of cards are depleted. Whoever has the most characters wins!

Special Rule: *On the very unlikely condition that all piles have a face up card and no player can fuck any of them, all face up cards in piles on the board are removed from the game and the game continues as normal.*
